# CONTENTS TO VOLUME 13

## PART 1 MAY 1962

The formation of vortex streets. By FREDERICK H. ABERNATHY and RICHARD E. KRONAUER *page* 1

Magnetohydrodynamic lubrication flow between parallel rotating disks. By W. F. HUGHES and R. A. ELCO 21

A theory of anisotropic fluids. By GEORGE L. HAND 33

Temperature-time histories at the interface between a gas and a solid. By JOHN F. CLARKE 47

Some theoretical results concerning the displacement of a viscous oil by a hot fluid in a porous medium. By F. J. FAYERS 65

Some specific features of atmospheric turbulence. By A. M. OBOUKHOV 77

A refinement of previous hypotheses concerning the local structure of turbulence in a viscous incompressible fluid at high Reynolds number. By A. N. KOLMOGOROV 82

Instability in Couette flow of solutions of macromolecules. By E. W. MERRILL, H. S. MICKLEY and A. RAM 86

On the behaviour of small disturbances in plane Couette flow. By A. P. GALLAGHER and A. McD. MERCER 91

On the expansion of a gas into vacuum. By H. P. GREENSPAN and D. S. BUTLER 101

On the stability of laminar flow of a dusty gas. By P. G. SAFFMAN 120

Free convection of fluid in a vertical tube filled with porous material. By R. A. WOODING 129

Transient gravity wave response to an oscillating pressure. By JOHN W. MILES 145

Note on the break-up of a charged liquid jet. By R. H. MAGARVEY and L. E. OUTHOUSE 151

REVIEWS

*Hydrodynamic and Hydromagnetic Stability* 158

## PART 2 JUNE 1962

A wake model for free-streamline flow theory. Part 1. Fully and partially developed wake flows and cavity flows past an oblique flat plate. By T. YAO-TSU WU 161

Standing waves on a contracting or expanding current. By G. I. TAYLOR 182

An experimental note on finite-amplitude standing gravity waves. By DAVE FULTZ 193

Experimental and theoretical analysis of vibrational relaxation regions in carbon dioxide. By N. H. Johannesen, H. K. Zienkiewicz, P. A. Blythe and J. H. Gerrard *page* 213

A note on the variation of vibrational temperature along a nozzle. By J. L. Stollery and J. E. Smith 225

The spectrum of a cross-stream component of turbulence in a tidal stream. By H. L. Grant and A. Moilliet 237

A theory for the viscous sublayer of a turbulent flow. By Joseph Sternberg 241

On plane linear magnetohydrodynamic waves. By Leon Trilling 272

On the question of the preferred mode in cellular thermal convection. By L. A. Segel and J. T. Stuart 289

A note on the sensitivity to yaw of a hot-wire anemometer. By C. A. G. Webster 307

Reviews

*Aerodynamik des Flugzeuges, Band II* 313

*Boundary Layer and Flow Control* 315

*The Plasma Dispersion Function* 320

*Developments in Mechanics, Vol.* 1 320

Part 3 July 1962

Second-order supercavitating hydrofoil theory. By C. F. Chen 321

Observations on distorted turbulent wakes. By A. J. Reynolds 333

The 'starting plume' in neutral surroundings. By J. S. Turner 356

A consequence of the zero fourth cumulant approximation. By Edward E. O'Brien and George C. Francis 369

Supersonic flow past cones of general cross-section. By P. M. Stocker and F. E. Mauger 383

Impulsive motion of an infinite plate in a compressible fluid with non-uniform external flow. By S. C. Traugott 400

The creeping motion of a non-Newtonian fluid past a sphere. By B. Caswell and W. H. Schwarz 417

A note on the inviscid Orr–Sommerfeld equation. By John W. Miles 427

On the generation of surface waves by shear flows. Part 4. By John W. Miles 433

The final approach to steady, viscous flow near a stagnation point following a change in free stream velocity. By R. E. Kelly 449

Electrode conduction processes in air plasmas. By D. W. George and H. K. Messerle 465
